

Tips For Hanging

Install the baldachin with a few simple steps...

BALI BALDACHIN INSTALLATION

BALI BALDACHIN

Scheherazade

Bamboo poles optional:

Please ask for your personal offer

BamBooBoom

CEILING HOOK

In any hardware store you get the ceiling hook's to hang the cords.

BALDACHIN

The baldachin contains instep cords to the fastening at every corner.

BAMBOO

At first at an installation with bamboo bars, pull the baldachin up with the loops and fix the bars with a separate cord over cross at the corner points. (img. 1) The whole frame can now be mounted on the ceiling. Then knot the baldachin tightly on the corners.

TASSEL

with the Tassels the sides Curtain can be bound together and place them with a small nail in the wall to the desired position.

FOUR-POSTER

For four-poster beds with a solid rack ideally suitable as over-throw.

WET HANGING

the canopy is a little "wrinkled" when he comes to you. If you wash it at 30C (without bleach) and hang it up moist - the wrinkles disappear by itself.

POSITION

consider upfront before "drilling" that you install the ceiling hook's with a offset of 20cm. So you get Room to move around the baldachin that you can „tight“ pulling.

So if the base of the baldachin is 200 x 200 the heels should better be installed with 20cm distance to the outside at the blanket - in our example: 220 x220.

The weight of the complete baldachin is about 3kg. Use as required and - depending on composition of the blanket, plug or hollow plug. (img.4)

If you use laundry detergent with high part bleach - the canopy will get "snow white".

**CAREFULLY
INSTALL
DO NOT
TEAR!**
